

Living with HIV today

The management of human immunodeficiency virus (HIV) now includes a focus on healthy aging. For many, it's more about managing specific associated health issues, such as HIV-related excess hard abdominal fat (Hard Belly).

Join us to learn more about HIV-related Hard Belly and its management.

Title: Living longer: Health issues associated with Hard Belly

Presented by: Nurse Educators

Details: This is a 30-minute presentation to inform patients about why some people living with HIV will develop Hard Belly and the related health consequences

Contact us: If you would like a Nurse Educator to present to patients, please send a request to: HardBellyeducation@FME.theratech.com
